APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all prior permits on the source still incomplete, and which when completed, will probably consume the total flow of the stream except perhaps during the flood period. It is further understood, on account of the above conditions, that the applicant hereunder will take out the water below the existing diversions on the stream so as to eliminate conflicts. A standard headgate and weir must be installed at or near the point of diversion to facilitate the measurement and control of water. The State reserves the right to regulate the use of the water herein granted at any and all times.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed One & 6/10 cubic feet per second. (1.6)

Actual construction work shall begin on or before September 15, 1916.

Proof of commencement of work shall be filed before October 15, 1916.

Work must be prosecuted with reasonable diligence and be completed on or before October 15, 1916.

Application of water to beneficial use shall be made on or before March 15, 1921. Proof of the application of water to beneficial use must be filed with State Engineer on or before April 15, 1921.

Map filed AUG 11 1916 (See #4100)

Proof of labor filed OCT 16 1916

Proof of completion of work filed NOV 10 1916

WITNESS MY HAND AND SEAL this 15th day

of June, 1916.

See No. 4100 to change point of diversion

Wm Kearney
State Engineer.
